Q: Is there any rhyme or reason to how I should place the Mixed FireBalls, or do I just kind of 'wing it'?!

A: I use photos from our website as a pattern for the ball placement <http://rasmussengaslogs.com/fireballs-vented/>

There are no rules, but when I install the Mixed FireBalls, I:

- 1) Place the larger FireBalls to the rear of the burner;
- 2) Place the Half-Balls flat side down on the pan medium, next to a larger ball, which creates a pocket onto which I place another ball;
- 3) Fill in the gaps with the other balls.
- 4) Rearrange as desired to adjust the flame (careful - the balls get too hot to touch without thick leather gloves).
